

# GREEN SKILLS FOR BOOSTING TRANSITIONS IN WATER MANAGEMENT

22 - 29 November, 2014 Valencia

INNOVATOR CATALYST

## 8 day coached programme

for experienced professionals on environment and water management areas

## What We Offer?

A **transition thinking approach** to match problems and solutions that suits better to each context.

Activities based on **self-made content** designed to encourage participants to further explore their own cases and challenges.

**E-learning platform** to facilitate exchange of multimedia materials and a networking space.

The **water issues as background scenario**. Investigate issues as cycle, industrial processes and water footprint working as linkages to open up participative and horizontal dynamics. Explore diverse strategies to develop solutions.

## What we expect from you?

- › Be ready to **share** the change objectives you are working on as well as your case study.
- › **Contribute** relevant knowledge and experiences to the group.
- › Open to **transdisciplinary thinking** and understanding.
- › A commitment or drive to achieve a low carbon society and the courage to change.

## Interested?

The programme is designed for a multidisciplinary audience. Specialized professionals in environmental issues at local, regional or national level are welcome.

- › **Policy staff** (urban planners, local decision-makers, tourism officers deciding on eco-touristic destinations...)
- › **Managers and technicians** (Industrial water treatment, NGOs, buiding sector, industrial services).
- › **Entrepreneurs**
- › **Researchers.**

## Why to apply?

It's an unique opportunity to **learn from a recognized team of international** and regional **experts new skills** and strategies to address and manage innovation projects and business models on sustainability issues, coupled with a **systemic approach relying on transition theory and socio-technical innovation.**

## Join us!
